GRAPHIC DESIGN INTERNSHIP REPORT

Tasks 1–6 | Portfolio Documentation

Intern: Nikita Khare

Organization: Synent Technologies

Role: Graphic Design Intern

Software: Canva

LinkedIn: nikita-khare-190a65277

Prepared as a portfolio and methodology report for six graphic design tasks.

1. Introduction

This report documents six graphic-design internship tasks completed using Canva. It summarizes each task's objective, general workflow, design considerations, and project link. The report is intended to accompany a public GitHub repository containing the README, project links, exported designs, and screenshots.

2. Software and workflow

Primary software: Canva

Documentation platform: GitHub

A general workflow for these tasks is to understand the communication objective, organize content by importance, choose a visual direction, compose the layout in Canva, review readability and consistency, and export or share the finished design. The detailed visual choices should be verified against each linked Canva project.

3. Task-by-task documentation

Task 1: Social Media Post Design

Objective: Create a single social media creative intended to communicate a message quickly in a feed format.

Methodology: Reviewed the design objective, arranged the content hierarchy, selected typography and visual elements, and balanced text with imagery for readability at social-media size.

Canva project: https://canva.link/ms2rom2vgrk1arf

Evidence: Add a screenshot/export of the final design to the repository before submission.

Task 2: Poster Design

Objective: Develop a poster composition that communicates its key message clearly at a glance.

Methodology: Organized headline and supporting information into a clear hierarchy, considered contrast and spacing, and arranged the visual elements to guide the viewer through the content.

Canva project: https://canva.link/xvzs11zfzhadf5r

Evidence: Add a screenshot/export of the final design to the repository before submission.

Task 3: Promotional Poster

Objective: Design a promotional poster intended to draw attention to an offer, activity, product, or message.

Methodology: Prioritized the promotional message, used a focal point to attract attention, and considered legibility, contrast, and the relationship between headline and supporting details.

Canva project: https://canva.link/f4ev7k6hcm3gfmx

Evidence: Add a screenshot/export of the final design to the repository before submission.

Task 4: Business Card Design

Objective: Create a compact professional identity piece suitable for exchanging contact information.

Methodology: Structured the information for quick scanning, balanced name and contact details, and considered alignment, whitespace, typography, and practical print readability.

Canva project: https://canva.link/im1j1j59vxg8bef

Evidence: Add a screenshot/export of the final design to the repository before submission.

Task 5: Brand Kit Identity

Objective: Develop a visual identity direction and organize core brand elements into a consistent kit.

Methodology: Considered consistency across visual elements, including colour, typography, and graphic style. The design link should be reviewed to confirm the exact brand assets included.

Canva project: https://canva.link/jbn4se1bnjygkec

Evidence: Add a screenshot/export of the final design to the repository before submission.

Task 6: Social Media Campaign

Objective: Create a campaign-oriented set of social media visuals with a consistent communication style.

Methodology: Approached the work as a coordinated set, considering consistency of visual language, content hierarchy, and recognizability across campaign posts.

Canva project: https://canva.link/797rvjab7zb8clg

Evidence: Add a screenshot/export of the final design to the repository before submission.

4. Skills practiced

• Visual hierarchy — emphasizing the most important message first.

• Typography — selecting and arranging text for readability.

• Colour and contrast — supporting clarity and visual emphasis.

• Layout and spacing — using alignment, balance, and whitespace.

• Brand consistency — maintaining a coherent visual language across materials.

• Format adaptation — considering the needs of social posts, posters, business cards, brand identity, and campaigns.

• Portfolio documentation — linking design projects and organizing supporting evidence.

5. Repository and evidence checklist

■ README.md with intern details, task summaries, methodology, and project links.

■ One clear screenshot or exported image for each of the six tasks.

■ Final PNG/PDF exports where appropriate.

■ This report saved in the repository's report/ folder.

■ All Canva links tested in a private/incognito browser window and set to view access.

■ Repository set to Public if required by the internship submission form.

6. Conclusion

These six tasks provide a documented overview of graphic-design practice across social media content, posters, promotional communication, business stationery, brand identity, and campaign assets. The Canva links provide access to the project pages; screenshots and exports should be included in the GitHub repository to make the submission easy to review and to meet evidence requirements.

Documentation note: The Canva pages could not be visually inspected during preparation of this report. The task descriptions therefore focus on the stated project types and general methodology and do not invent specific colours, fonts, visual assets, or performance results.
